

Odoo for Financial Management

The Company

An East Asia based manufacturing company, with major focus on exports.

The Challenge

The client want to implement such a flexible financial system which allows them to handle all their financial data in flexible and easy manner with ability to produce various financial reports based on multiple parameters.

The client also wanted to have localization for their country to be implemented with complex tax and financial requirement.

The Major requirements were as followed:

- Localization as per country's financial regulation
- Reporting for Multi Company Environment
- Report based on parameters
- Customizable Report Format
- Report formatting with CSS and HTML output

The Solution

OpenERP/Odoo implementation using core addons and some custom developed module a solution was created providing following functionalities.

- OpenERP/Odoo financial module as per localization requirements.
- OpenERP/Odoo Web Kit Report for producing reports in HTML format.

The Result

After implementation of OpenERP/Odoo and desired functionality, client was able to use system to manage all their financial data in quick and easy manner, with ability to produce various reports as per their format.
