

Ijssel Hospital Implements Odoo

Odoo integrated with another bussiness management system. One of the largest hospital based out of Rotterdam.

Requirements

Integrating their existing ERP SAP with Odoo.

Solution

Integrating SAP and Odoo will be one of the greatest achievement for both popular propitiatory and open source applications. Odoo will be used for the order management from the various departments of the hospital. The orders will be placed into SAP DB on a real time basis and its status will be returned. The configuration data from SAP will be synchronized into Odoo DB on a daily basis.

Modules provided: Order Management
