Warehouse Management System A revolutionary double entry inventory system

Decrease your process times, automate transactions, reduce your stock levels and get complete traceability on all operations with the Odoo double entry inventory system.

Double Entry Inventory Management Nothing is lost, everything is moved

Based on the double entry system that revolutionized accounting, this open source inventory management software isn't about consumption, loss or missing products; products are just moved from one location to another.

Benefits include full traceability (from customer to supplier, not limited to your warehouse), advanced reporting (e.g. inventory valuation on manufacturing counterparts' locations) and a very simple user interface.

Decrease your process time

Odoo prepares all operations for you, according to your own logistic rules, push rules, pull rules, make-to-order, minimum stock rules, etc. Optimize the planning and jobs with the scheduler to reduce your process time.

Automatic Transactions

Schedule your picking, packing, receptions and internal moves automatically with Odoo using your own routing rules. Define push and pull rules to organize a warehouse or to manage product moves between several warehouses.

Menu < Previous

WH/IN/00011 Create backorder

Operations To Do Filter by location... x

Product	Scanned	Todo	From	To
[GRAPs/w] GrapWorks Software	- 2 +	4 Unit(s)	Partner Locations/Suppliers	WH/Stock
[TONER] Toner Cartridge	- 1 +	3 Unit(s)	Partner Locations/Suppliers	WH/Stock
[INK] Ink Cartridge	- 0 +	9 Unit(s)	Partner Locations/Suppliers	WH/Stock

Get Full Traceability

Keep an eye on all your stock by tracing all your past and future inventory transactions. Track in detail all stock moves, not only in your warehouse wherever else it's taken as well (customers, suppliers or manufacturing locations).

Browse through the upstream or downstream traceability flows to get a clear view of what happened to a specific product or shipment.

Reduce Your Stock Level

Fine-tune procurement methods according to your needs

Reduce your stock while always staying replenished! You can setup minimum stock rules to have automatic procurements, with the right quantities computed to get to the optimum level specified. Get rid of stress and let the system help you with fulfillment propositions.

Fully Integrated with Operations

Sales, Purchases and Accounting integration

Make accurate procurements. Odoo WMS is fully integrated with sales purchases for accurate forecasts. The accounting integration allows real time accounting valuation and deeper reporting on costs and revenues your inventory operations.

Track Serial Numbers

Assign serial numbers at every step of your reception or delivery flow. Odoo handles production lots (batches of identical products) or logistic lots (pallets, boxes, etc) to help you get full upstream or downstream traceability.

[CARD] Graphics Card
 Price: 885.00
 On hand: 16.000 Unit(s)
 Forecasted: 16.000 Unit(s)

[CD] Blank CD
 Price: 20.00

Scale Your WMS easily

Manage your own internal and external locations, customers, suppliers or manufacturing inventories with the Odoo multi-warehouse management system based on a hierarchical location structure. It's a great feature both for small businesses and for big companies.

Reporting and Dashboards

Analyse your warehouse efficiency to improve performance

Get the insights you need to make smarter decisions. Design custom dashboards to find out your warehouse efficiency at a glance. Dig deep with real-time reports that anyone can create and share.
