

Delhy Implements Odoo

Delhy is developing and manufacturing pharmaceutical products that must meet exact standards in accordance with the strict quality control criteria. Standart Odoo system is fully in line with the company's needs

Dehly is developing and manufacturing pharmaceutical products that must meet exact standards in accordance with the strict quality control criteria.

Dehly has many stock management processes and requirements:

- raw material purchasing or delivery by the supplier;
- batch lot management;
- production and expiration dates;
- multiple locations;
- batch-lot release or refused status.

Dehly has around 20 employees, out of which 6 which are using Odoo currently.

Challenge

Have a solution which permits to trace batch/lot management, manage BoM, release manufacturing orders, enter and issue components, purchase, sales orders, packing, shipping and invoicing with many different pricelists. Before Odoo, all the management was done with Excel.

Solution

We use standard modules to reach the requirements, except module to fulfil the batch/lot release.

Modules provided: Modules provided ranged from purchase to sales, including warehouse management, manufacturing orders, statistics, finance and controlling. Output has been improved regarding customer needs.
